

# B2B Sales Performance Analysis

Strategic Assessment & Recommendations

**Tushar Verma**

Strategy & Partnerships Analyst

📅 February 2026

🌐 Bengaluru

# Core Assumptions

## DATASET SCOPE

**1,684** Opportunities

Analysis based on cleaned CRM export data. Duplicates and erroneous entries have been removed to ensure statistical accuracy.

Data Integrity

✓ Verified

*\* Wherever data points like 'Industry' or 'Employee Count' were missing, they have been categorized as 'Others' or 'Not Applicable'.*

*Please note : Certain columns have been removed due to duplicity and hence the total number of opportunities are 1,684 instead of 1,717 .*

## Status Classification Logic

**Won**

Payment Completed

**Lost**

Closed Deal

**Unqualified**

Early Disqualified

## Deal Value Definition

"Deal Size" is interpreted as **Total Contract Value (TCV)** in INR. All values have been normalized for aggregate currency analysis.

## Temporal Constraints

Due to the absence of specific date stamps in the source file, this analysis presents a **cumulative performance snapshot** rather than time-bound trends (MoM/QoQ).

# Overall Sales Performance

## High Activity, Low Efficiency

The team is processing high volumes, but conversion leakage is critical.

TOTAL REVENUE

Rs

₹40.8 Cr

Closed Won Deals

WIN RATE

24.3%

Of Qualified Deals

AVG DEAL SIZE

₹

₹24.4 L

Median: ₹2.7 Lakhs

UNQUALIFIED

56%

947 Leads Dropped

⚠ Critical Insight

The sales team is **busy but not efficient**. A massive volume of leads (1,684) is being worked, yet **947** are disqualified *after* engagement, wasting significant SDR bandwidth.

# What the Team Is Doing Well

## Enterprise Capability

**76.1%**  
REVENUE FROM TOP 5 SMS

High-ticket deal closure proficiency

### TOP REVENUE CONTRIBUTORS

|                  |          |
|------------------|----------|
| Sameer Iftekhari | ₹20.2 Cr |
| Sonal Paithankar | ₹4.7 Cr  |
| Vikas Gupta      | ₹2.5 Cr  |

Demonstrated ability to close **complex enterprise accounts** in BFSI & Retail verticals, aligning perfectly with Kapture CX's Ideal Customer Profile (ICP).

## Market Coverage

Geographic & Vertical Expansion

### STRONG ENTERPRISE HUBS

|                                           |                                           |                                         |
|-------------------------------------------|-------------------------------------------|-----------------------------------------|
| Pune<br><b>₹27.3 Cr</b><br>Dominant Share | Mumbai<br><b>₹4.1 Cr</b><br>Financial Hub | Bangalore<br><b>₹3.3 Cr</b><br>Tech Hub |
|-------------------------------------------|-------------------------------------------|-----------------------------------------|

### VERTICAL WIN RATES

|               |                       |
|---------------|-----------------------|
| Education     | <b>20.0% Win Rate</b> |
| IT Services   | <b>13.6% Win Rate</b> |
| Manufacturing | <b>11.0% Win Rate</b> |

# What the Team Is Doing Wrong

## ▼ Poor Lead Qualification

Priority 1

**56%** of opportunities are **Unqualified**

→ Weak ICP filtering is burning SDR time & bandwidth. The team is optimizing for volume rather than fit.

## 📉 High Loss Rate

Efficiency Issue

**3:1** Loss Ratio (519 Lost vs 167 Won)

→ Significant leakage post-engagement. Indicates gaps in value articulation, competitive differentiation, and ROI justification.

## ⚠️ Revenue Concentration

Scalability Risk

**88.3%**

Revenue by Top 10 SMs

**43%**

SMs with ZERO Wins

→ High dependency on a few stars. 22 out of 51 managers haven't closed a deal, creating predictability issues.

## ⌚ Weak Late-Stage Pipeline

Future Risk

**51**

Total Deals in Late Stages

→ Only 51 deals in Demo/Negotiation/Proposal combined. Suggests deals are stalling without structured progression.

# Strategic Recommendations

01

HIGHEST IMPACT

## Fix Lead Qualification

Implement strict ICP & scoring framework focusing on Retail, BFSI, & Travel. Set minimum employee size thresholds.

TARGET OUTCOME

Unqualified &lt; 30%

02

## Optimize Lead Source Mix

Shift sales effort from low-converting cold calls to high-probability warm and inbound channels.

TARGET OUTCOME  
Higher Quality Pipeline

03

## Codify Top Performer Playbooks

Reverse-engineer top 5 SM wins. Document buyer personas, objection handling, and competitive win stories.

TARGET OUTCOME  
Repeatable Sales Motion

04

## Strengthen Mid-Funnel

Introduce demo success checklists, ROI calculators, and industry-specific narratives. Leverage hyper-personalization.

TARGET OUTCOME  
Increased Conversion

05

## Build Verticalized Partnerships

Form alliances with CRM vendors and e-commerce platforms. Co-sell into accounts primed for CX transformation.

TARGET OUTCOME  
Larger Deal Sizes

# Final Verdict

## Current State

-  **High Activity, Low Efficiency**  
Volume-based approach yielding minimal conversion
-  **Severe Qualification Leakage**  
56% of opportunities are unqualified post-engagement
-  **Revenue Concentration Risk**  
High dependency on top 10 sales managers
-  **Inconsistent Performance**  
Large variance in win rates across the team

## Potential State

-  **2-3x Revenue Productivity**  
Achieved through strict qualification & ICP focus
-  **Vertical Focus Mastery**  
Improved win rates & larger deal sizes in key sectors
-  **Scalable & Predictable**  
Playbook-driven selling reduces rep variance
-  **No Additional Headcount**  
Optimizing existing resources for growth

### STRATEGIC UPSIDE

**"The same team can achieve 2-3x revenue productivity without increasing headcount by implementing these strategic improvements."**
